

Repair Visual Studio Tools for Office Runtime

1) Go to Start Menu → type “control” and open Control Panel

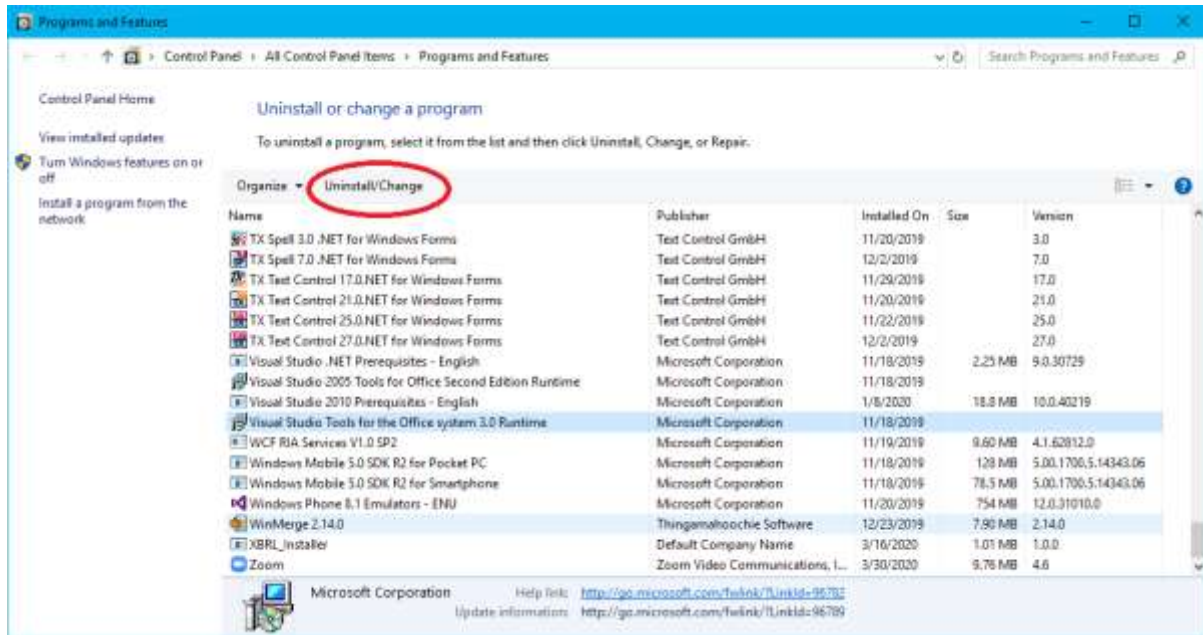

2) Go to Control Panel -> Uninstall a program

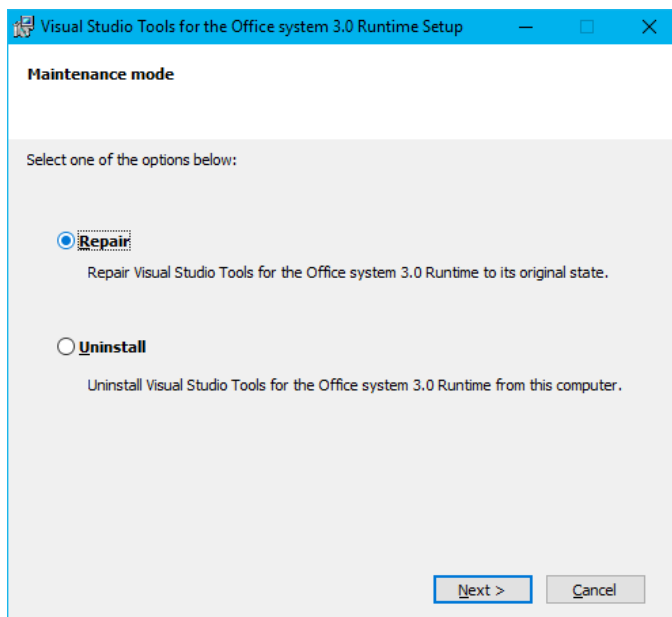

- 3) Scroll to “Visual Studio tools for Office 2010 Runtime”. If you have Office 2007 installed, select “Visual Studio tools for Office system 3.0 Runtime” instead. If you have Office 2003 installed, select “Visual Studio tools for Office system 2.0 Runtime or Visual Studio 2005 tools for Office Second edition runtime”

Right click and select Uninstall/Change and in the resulting window select “Repair” and continue.

- 4) Select Repair and click Next.

- 5) Click Finish to close.
